

STONE MOUNTAIN TOOL

REAL SOLUTIONS

CREATIVE SOLUTIONS

Simply matching a pallet is not our approach. We accurately identify and efficiently solve your PCB Manufacturing Process. We interview and examine your needs, function and process. We design, review and build the most functional, cost effective, appropriate solution.

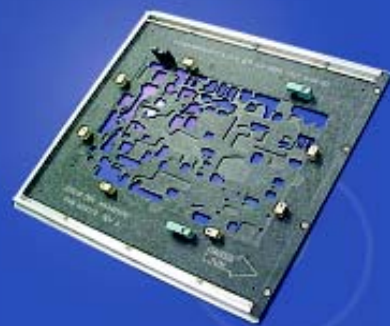

CAPABILITY

Our design procedure provides years of experience in PCB Manufacturing with Solder Mount Technology and the processing of printed circuit assemblies. We deliver solutions to the rapidly increasing demands of the electronics industry.

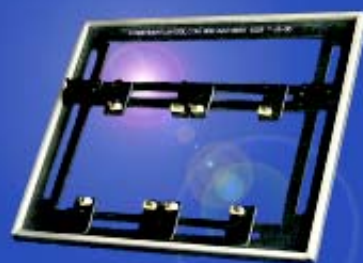

MATERIALS

We manufacture our pallets from the most advanced and proven epoxy and polyester composites, including materials for lead free applications. The use of G-10 and FR-4; Plastics: Delrin and Teflon; Metals: Aluminum, Titanium and Stainless Steel; and Graphite are utilized to effectively solve the PCB Manufacturing Process.

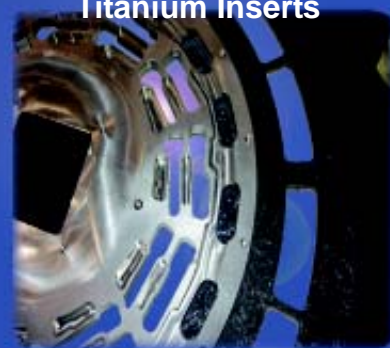

Selective Solder

Adjustable Coating Fixture

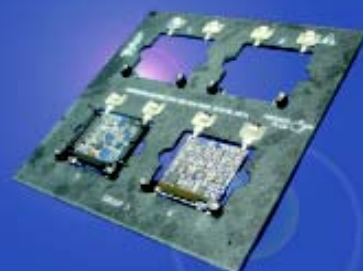

Selective Solder with Titanium Inserts

Coating Masking Devices

Conformal Coating
